

Mr. Dillon Draughn is a coastal engineer with a deep-rooted connection to Northwest Florida, where he has lived most of his life. Growing up along the Gulf Coast, he developed a strong appreciation for the local marine environment through boating, fishing, and hands-on experiences with the region's waters. He holds both Bachelor's and Master's degrees in Civil and Coastal Engineering from the University of South Alabama and has since built a notable career in Florida. As a Coastal Engineer with Moffatt Nichol, Mr. Draughn has collaborated in numerous multi-million-dollar waterfront projects, bringing expertise in coastal hydrodynamic modeling, permitting, nature-based solutions, and the complex dynamics of coastal processes. Known for his proficiency in coastal and marine construction, Mr. Draughn is a respected professional in the field, dedicated to creating sustainable, innovative solutions for coastal development and protection.
